

# SERVICE ENGINEER

JOB REF: 202306AL-SERVICE-ENGINEER

## JOB OVERVIEW

Aldercote is looking for a multi skilled service engineer. The successful applicant will be hard-working and able to understand and repair mechanical, electrical and hydraulic systems.

The successful candidate will learn to diagnose and fix a wide range of technical faults, with the support from specialist controls and hydraulics engineers. They will have the professional attitude and demeanor consistent with being an ambassador for a company which is becoming the UK's leading supplier of vehicle-mounted access platforms. They will embrace the work ethic, friendly culture, and spirit of creativity of our ambitious and growing company.

## WHAT THE ROLE INVOLVES

- Understanding hydraulic drawings, and using them to diagnose faults
- Driving to faulty machines across Yorkshire, and occasionally further afield
- Communicating professionally with vehicle operators and their managers
- Keeping accurate records of time and mileage
- Contributing ideas for product design improvements

## EDUCATION / QUALIFICATIONS REQUIRED

- Clean driver's license

Aldercote is the leading UK manufacturer of vehicle-mounted access platforms. The main portfolio consists of access platforms mounted to vans, pickups, and tracked crawlers, although bespoke options are also available. Aldercote is proud to design and manufacture high performance products that help our customers build and maintain the nation's infrastructure.

Aldercote is a family run business that puts people first. This is shown in our customer care and by valuing every employee for their passion, expertise and individuality.
